

OMKAR KISHOR RASAL

Pune, India | 9819139288 | omkarrasal865@gmail.com | linkedin.com/in/omkarrasal865

Operated as an extension of co-founders at a deep-tech startup — driving strategic planning, cross-functional execution, and operational efficiency across finance, product, recruitment, and operations simultaneously. Built systems from scratch that stuck: PMO adopted in 3 weeks, AI hiring tool reducing screening effort by 70–80%, engineer allocation model adopted in 2 weeks. AI-first operator comfortable with investor-grade decks, leadership briefings, and stepping into ambiguous high-stakes situations independently.

CORE SKILLS

- **Strategy & Market Intelligence:** Market Research · Competitive Analysis · GTM Strategy · Market Sizing · Strategic Positioning
- **Operations & Execution:** PMO Setup · Sprint Planning · Program Management · Financial Modelling · MIS Reporting · OKR Tracking
- **AI & Automation:** LLM Integration · AI Agent Workflows · n8n · Zapier · Make (Integromat) · Python · MCP Servers
- **Tools:** Notion · MS 365 · Power BI · Google Analytics · Figma · JIRA · Zoho Recruit

EXPERIENCE

Founder's Office Intern — Strategy, Operations & Product · [ERIC Robotics](#) · Pune Aug 2025 – Present

- **AI Screening System (shipped):** Owned end-to-end PRD, system design and build for an AI-powered hiring tool — automated resume parsing, LLM scoring (0–100), Shortlist/Reject decisions, and write-back to Zoho ATS; reduced HR screening effort by 70–80% with zero engineering dependency post-launch.
- **PMO from scratch:** Interviewed all employees to map execution gaps; designed sprint cycles, QoQ roadmaps, and sync cadences — adopted across 4 teams within 3 weeks.
- **Finance & MIS:** Ran monthly MIS across live PSU projects (BOM, logistics, HRA, client commercials); built OPEX model for Robotics-as-a-Service — delivered QoQ/YoY variance analysis directly to co-founders as decision-support intelligence.
- **HRP & Resource Allocation:** Built custom engineer allocation model across project, task & subtask levels — adopted by co-founders for all active projects within 2 weeks.
- **Market Intelligence, GTM & Strategy:** Led competitive analysis and market sizing for rail defect detection (B2G/B2B, Indian Railways/PSUs); built phased GTM plan adopted as go-to-market blueprint. Led new venture evaluation for PCB defect detection — findings triggered R&D initiation. Prepared pitch decks, business plan presentations, and investor-grade materials for co-founders.

Project Secretary · [Indus Connect](#) · Bangalore (Remote) Aug 2024 – Apr 2025

- Led a 4-member cross-departmental team on a live industry project; managed stakeholder coordination, timelines, and deliverables — 100% on-time delivery with 20% reduction in development costs.

Media & Marketing Lead · [Veloce Racing Electric](#) · Pune Jan 2023 – Feb 2024

- Developed business plan and financial model for Formula Bharat 2024; contributed to strategic positioning — team secured AIR 5 nationally in the EV category.

PROJECTS

AI-Powered Candidate Screening System — Zoho Recruit · Python · LLM · MCP Server [GitHub](#) | [Notion PRD](#)

- PRD-first: defined problem statement, user flows, success metrics, and risk mitigations before writing a line of code — structured ambiguity into a clear execution plan.
- MCP server orchestrates Zoho API (candidate fetch) + OpenAI API (resume evaluation) → LLM scoring → batch processor → ATS write-back; Score >85 = Shortlist, 70–85 = Review, <70 = Reject.

Abhivridhi EDGE — Participant Engagement Platform — MVP · A/B Testing · PRD

- Launched MVP platform used by 1,400+ participants; ran A/B experiments improving adoption rates by 30%.

WiseHome — Home Automation App for Elderly — Figma · User Research · Rapid Prototyping Prototype

- Designed mobile app prototype for elderly users — 40% usability improvement, 25% faster onboarding via rapid prototyping and user research.

EDUCATION

B.Tech Mechanical Engineering · VIT Pune (SPPU) · GPA: 8.12 Graduating May 2026

ACHIEVEMENTS & PUBLICATIONS

- **Patent filed** (App. No. [202521093278](#)) — “Parabolic Light Concentrator as a Pre-Heater for Solar Stills”: identified real-world inefficiency and designed scalable passive solution for solar water distillation.
- **Scopus-indexed research** presented at ICCRET & MSMAT 2025 (international conferences) — structured experimentation and validated engineering systems under academic rigour.
- Top 10 among 925+ teams at Internal Smart India Hackathon (ISIH 2025) — structured ambiguous problem statements into executable solutions under tight timelines.
- Ranked **AIR 5** at Formula Bharat 2024 (EV category); **2nd place nationally** at Ather Energy Pi-EV strategy competition.

POSITION OF RESPONSIBILITY

- **Branding Executive** | **Abhivridhi** (Student Training & Development Committee) — led a cross-functional team of 40+ members across branding; executed two flagship events with 2,000+ attendees.
