

OMKAR KISHOR RASAL

Pune, India | 9819139288 | omkarrasal865@gmail.com | [linkedin.com/in/omkarrasal865](https://www.linkedin.com/in/omkarrasal865) | [Omkar-portfolio](#)

Built and shipped a production AI agent at ERIC Robotics — MCP server orchestrating Zoho and OpenAI APIs, automated end-to-end candidate scoring and ATS write-back, 70–80% reduction in screening effort with zero engineering dependency. PRD-first, prototype-first builder who stays close to implementation. Comfortable with LLM orchestration, agentic workflows, and rapid iteration — not as concepts, but as shipped systems.

CORE SKILLS

- **Product:** PRD Writing · User Research · Roadmapping · Feature Prioritization · OKRs · A/B Testing · Success Metrics Definition
- **Agentic AI & LLMs:** LLM Orchestration · MCP Servers · AI Agent Workflows · Prompt Engineering · OpenAI API · RAG · HITL Design
- **Prototyping & Automation:** Python · Streamlit · Cursor · n8n · Zapier · Make · Lovable
- **Tools:** Figma · Notion · JIRA · Whimsical · MS 365 · Google Analytics · Power BI · Claude code

EXPERIENCE

Founder's Office Intern — Product & Strategy · ERIC Robotics · Pune

Aug 2025 – May 2026

- **AI Agent — Shipped:** Owned full PRD, user research, and system design for a production AI hiring agent — MCP server orchestrating Zoho Recruit API (candidate fetch) + OpenAI API (LLM scoring engine) → batch processor (parallel, failure-safe) → ATS write-back; HR queries via natural language prompts; 70–80% reduction in screening effort, zero engineering dependency post-launch.
- **Product Sense in Practice:** Identified broken hiring workflow before users reported it — mapped friction points via user interviews, defined success metrics (screening time, auto-classification %, HR adoption rate), and shipped a solution with measurable outcomes.
- **PMO from scratch:** Interviewed all employees to map execution gaps; designed sprint cycles, QoQ roadmaps, and sync cadences — adopted across 4 teams within 3 weeks.
- **HRP Formula:** Built custom engineer allocation model across project, task & subtask levels — adopted by co-founders for all active projects within 2 weeks of rollout.
- **Finance & MIS:** Ran monthly MIS for PSU projects and client finance; built OPEX model for Robotics-as-a-Service — QoQ/YoY variance analysis delivered directly to founders.
- **GTM & Strategy:** Contributed to pitch decks, GTM & PMF frameworks, market research, and venture evaluation — translated founder thinking into structured, shareable assets.

Project Secretary · Indus Connect · Bangalore (Remote)

Aug 2024 – Apr 2025

- Led a 4-member cross-departmental team building a CNC Controller MVP; 100% on-time delivery and reduced development costs by 20%.

Media & Marketing Lead · Veloce Racing Electric · Pune

Jan 2023 – Feb 2024

- Developed business plan for Formula Bharat 2024 using market analysis and financial modelling — team secured AIR 5 nationally in the EV category.

PROJECTS

AI-Powered Candidate Screening System — MCP Server · Zoho Recruit · OpenAI API · Python · Streamlit

[GitHub](#) | [Notion PRD](#)

- **Agentic design:** MCP server as orchestration layer — Zoho API (candidate fetch) → LLM scoring engine → batch processor (parallel, failure-safe, incremental save) → ATS write-back; natural language interface for HR; Score >85 = Shortlist, 70–85 = Review, <70 = Reject.
- **PRD-first:** Defined problem statement, user flows, success metrics, and risk mitigations before writing a line of code — shipped with measurable outcome tracking built in.

FairSplit AI — AI-Powered Expense Allocation & Settlement Engine — FastAPI · Gemini AI · Python

[Live Demo](#) | [GitHub](#)

- Built and deployed an **AI-powered expense reconciliation platform** that converts receipt images and natural-language inputs into auditable per-user settlements.
- Designed **allocation, validation, and reconciliation engines** supporting shared items, quantity splits, exclusions, taxes, discounts, and payment ownership while maintaining bill-level accuracy.
- Created a **Needs Clarification workflow** that detects ambiguity, generates follow-up questions, and prevents low-confidence financial allocations.

Abhivridhi EDGE — Participant Engagement Platform — MVP · A/B Testing · PRD

[Website link](#)

- Launched MVP used by 1,400+ participants; ran A/B experiments with clear hypotheses and outcome metrics — improved adoption rates by 30%.

EDUCATION

B.Tech Mechanical Engineering · VIT Pune (SPPU) · GPA: 8.29

Nov 2022 – May 2026

ACHIEVEMENTS & PUBLICATIONS

- **Patent filed** (App. No. [202521093278](#)) — “Parabolic Light Concentrator as a Pre-Heater for Solar Stills”: identified real-world inefficiency and designed scalable passive solution for solar water distillation.
- **Research presented** at ICCRET & MSMAT 2025 (international conferences) — structured experimentation, validated systems under academic rigour.
- **Top 10 among 925+ teams** at Internal Smart India Hackathon (ISIH 2025) — structured ambiguous problem statements into executable solutions under tight timelines.
- Ranked **AIR 5** at Formula Bharat 2024 (EV category); **2nd place nationally** at Ather Energy Pi-EV strategy competition.

POSITION OF RESPONSIBILITY

- **Branding Executive** | **Abhivridhi** (Student Training & Development Committee) — led a cross-functional team of 40+ members across branding and executed two flagship events with 2,000+ attendees.
